## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1 and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Ito et al (5696576).

Regarding claim 1, Ito discloses an image processing apparatus capable of accessing a recording medium on which both image data representing a plurality of images and image recording time data representing times at which the image data is recorded are electrically recordable and erasable (column 4, line 45-56, column 6, lines 25-59, column 12, lines 35-68, Abstract) comprising:  
an ordered-image designating device for designating an ordered image to be printed from among images represented by image data that has been stored on the recording

Art Unit: 2621

medium; and

an ordering information record control device for electrically recording on the recording medium\_storing, in association with the image data representing the ordered image, ordering information for the ordered image designated by said ordered-image designating device and designation time data representing time at which the ordered image is designated (column 12, lines 35-68).

Method claim 11 corresponds to apparatus claim 1. Therefore method claim 11 is rejected by the same reason as applied to apparatus claim 1.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HUY T. NGUYEN whose telephone number is (571) 272-7378. The examiner can normally be reached on 8:30AM -6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Groody can be reached on (571) 272-7950. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
